## Black Magic Equalizer Harness...

### unique design...

Moulded and contoured padded components give you a stronger yet lighter and less bulky harness. Unlike conventional kidney harnesses the Black Magic Equalizer divides the strain between the upper thigh/buttocks area and the lower back using innovative twin element padded supports.

### balance...

The free running lug clips allow the load to be distributed evenly between the two elements of the harness.

### less effort...

By having the angle of pull lower on the angler the pressure applied to the rear lugs is increased by up to 50% without any extra effort.

## Now in three sizes

### junior...

for juniors and slightly built anglers

### standard...

a proven stand-up performer used to catch marlin up to 561.5kg (1,238lb)

### introducing...

### the new XL WIDE

to match the new XL WIDE gimbal  
- wider and deeper padding
